

EXHIBIT 11  
DATE 2/18/09  
HB 502

**Statement of PPL Montana  
Before the Natural Resources Committee  
Of the Montana House of Representatives  
In Opposition to House Bill 502  
February 18, 2009**

**Mark Lambrecht, Manager, Regulatory Affairs  
208 N. Montana Avenue, Ste. 204  
Helena, Montana 59601  
(406) 422-1092**

Mr. Chairman and members of the Committee:

I'm Mark Lambrecht, Manager of Regulatory Affairs for PPL Montana—operator of the Colstrip Steam Electric Station. I'm here on behalf of PPL Montana and the co-owners of the Colstrip plant, including Avista Corporation, NorthWestern Energy, PacificCorp, Portland General Electric and Puget Sound Energy. PPL also owns and operates the J.E. Corette Steam Electric Station in Billings and eleven hydroelectric facilities in Montana.

Our opposition to this bill is limited to three points:

- 1) The Montana Board of Oil and Gas Conservation, rather than the Board of Environmental Review, should have primary authority on this issue. The Board of Oil and Gas already has expertise and many of the necessary rules in place to administer a sequestration permitting program.
- 2) This bill assigns liability to the sequestration permit holder for 75 years following closure of a well. Geologic carbon sequestration requires permanent storage of carbon dioxide. This bill should assign liability after that period to the State of Montana to protect public health and the environment in the long term.
- 3) The Montana Legislature should conduct a thorough legal analysis before assigning ownership of pore space. Assigning ownership to the State of Montana could very well violate the property rights of surface or mineral owners.

For these reasons, we ask that you give this legislation a "do not pass" recommendation.

Thank you for the opportunity to comment.

MONTANA FIRST JUDICIAL DISTRICT COURT

COUNTY OF LEWIS AND CLARK

\* \* \* \* \*

MONTANA ENVIRONMENTAL INFORMATION  
CENTER, a Montana non-profit  
corporation, and THE MONTANA  
FREEDOM OF INFORMATION HOTLINE,  
INC., a Montana non-profit  
corporation,

Plaintiffs,

vs.

MONTANA DEPARTMENT OF STATE LANDS,  
a Department of the State of  
Montana,

Defendant,

and

THE MONTANA MINING ASSOCIATION,

Intervenor-Defendant.

\* \* \* \* \*

Cause No. CDV-92-020

MEMORANDUM AND ORDER

The issue before the Court is whether Section 82-4-  
306, MCA, is unconstitutional because it violates Article II,

1 Section 9, of the Montana Constitution. The issue has been  
2 fully briefed and is ready for decision.

3 BACKGROUND

4 On November 25, 1991, James Jensen, executive director  
5 of the Montana Environmental Information Center (MEIC), wrote  
6 Sandy Olsen, chief of the Hard Rock Bureau of the Montana  
7 Department of State Lands (DSL), requesting information about  
8 four exploration licenses issued by DSL for mining exploration  
9 on private land. In his letter Jensen stated that he was  
10 especially interested in any restrictions or requirements,  
11 including performance bonds, which might have been placed on the  
12 licensees relating to hazardous materials management, air and  
13 water quality protection and reclamation. He also requested a  
14 copy of the environmental assessment DSL had prepared on the  
15 exploration permit for the Montanore project, a large explora-  
16 tion tunnelling project adjacent to and beneath the Cabinet  
17 Mountains Wilderness Area.

18 Relying on the provisions of Section 82-4-306, MCA,  
19 Olsen wrote Jensen on November 26, 1991, stating that she could  
20 not approve his request to look at specific exploration files  
21 concerning private lands. Also on November 26, 1991, Jensen  
22 received a press release from Noranda Minerals Corp., owner of  
23 the Montanore project, stating that Noranda was interrupting its  
24 exploration tunnelling activities at the Montanore project in  
25

1 response to an "advisory issued by the Montana Department of  
2 State Lands requiring that Noranda Minerals initiate immediate  
3 action to reduce nitrate levels in the water of Libby Creek."

4 Plaintiffs filed this action on January 6, 1992. On  
5 January 9, 1992, Noranda Minerals' project director for the  
6 Montanore project wrote DSL and gave DSL a partial waiver of  
7 confidentiality as to the Montanore project. The letter stated  
8 that the file does not contain proprietary geological  
9 information.

#### 10 DISCUSSION

11 Section 82-4-331(1), MCA, provides that no one may  
12 engage in exploration without first obtaining an exploration  
13 license from DSL. Under Section 82-4-332, MCA, an application  
14 must "include an exploration map or sketch in sufficient detail  
15 to locate the area to be explored and to determine whether  
16 significant environmental problems would be encountered." The  
17 applicant must also submit a plan of operation which provides a  
18 detailed description of the proposed exploration activities; a  
19 description of the environment potentially affected by the  
20 exploration activities; and a reclamation plan.

21 After DSL determines that an application is complete,  
22 it evaluates the information submitted; does a site inspection;  
23 and prepares an environmental assessment. As part of its  
24 review, DSL determines whether conditions should be placed on a  
25

1 license. Also, a reclamation bond needs to be posted prior to  
2 issuance of any exploration license. After a license has been  
3 issued, DSL monitors the licensee to insure compliance with the  
4 license requirements and state laws. As part of the monitoring  
5 process, the licensee may be required to submit periodic reports  
6 to DSL. If it appears that a licensee is not in compliance with  
7 its license, DSL may issue a notice of non-compliance and order  
8 the licensee to take corrective action. DSL's file on a partic-  
9 ular license may contain correspondence, notes from telephone  
10 calls and meetings and citizens' complaints.

11 Section 82-4-306, MCA, provides:

12 Confidentiality of application  
13 information. (1) Except as provided in  
14 subsections (2) and (3), any information  
15 obtained by the board or by the director or  
16 his staff by virtue of applications for  
17 exploration licenses and all information  
18 obtained from small miners is confidential  
19 between the board and the applicant, except  
20 as to the name of the applicant and the  
21 county of proposed operation; provided that  
22 all activities conducted subsequent to ex-  
23 ploration and other associated facilities  
24 shall be public information and conducted  
25 under an operating permit.

(2) Any information referenced in sub-  
section (1) is properly admissible in any  
hearing conducted by the director, the  
board, appeals board, or in any judicial  
proceeding to which the director and the  
applicant are parties and is not confiden-  
tial when a violation of this part or rules  
adopted under this part has been determined  
by the department or by judicial order.

(3) The department may disclose

1 information obtained by the board, the  
2 commissioner, or department staff from  
3 exploration license applications and from  
4 small miners for exploration or mining on  
5 state and federal lands that identifies the  
6 location of exploration and mining  
7 activities and that describes the surface  
8 disturbance that is occurring or projected  
9 to occur. The department may not disclose a  
10 licensee's or small miner's proprietary  
11 geological information.

12 (4) Failure to comply with the secrecy  
13 provisions of this part is punishable by a  
14 fine of up to \$1,000. (Emphasis supplied.)

15 Plaintiffs contend that this statute, which requires  
16 DSL to keep confidential all information obtained by it from  
17 applicants for exploratory licenses or from small miners,  
18 irreconcilably conflicts with Article II, Section 9, of the  
19 Montana Constitution which provides:

20 Right to know. No person shall be  
21 deprived of the right to examine documents  
22 or to observe the deliberations of all  
23 public bodies or agencies of state govern-  
24 ment and its subdivisions, except in cases  
25 in which the demand of individual privacy  
clearly exceeds the merits of public  
disclosure.

26 The Montana Supreme Court has developed a two-part  
27 balancing test to determine whether a person has a constitu-  
28 tionally protected privacy interest. Montana Human Rights Div.  
29 v. City of Billings, 199 Mont. 434, 442, 649 P.2d 1283, 1287  
30 (1982). First, there must be a determination as to whether a  
31 person has a subjective or actual expectation of privacy. The  
32 second part of the test is a determination of whether society

1 would recognize that expectation as reasonable. In applying the  
2 test to the Montana Open Meeting Act, the court stated:

3           However, the right to know is not  
4 absolute. The more specific closure stan-  
5 dard of the constitutional and statutory  
6 provisions requires this Court to balance  
7 the competing constitutional interests in  
8 the context of the facts of each case, to  
9 determine whether the demands of individual  
10 privacy clearly exceed the merits of public  
11 disclosure. Under this standard, the right  
12 to know *may* outweigh the right of individual  
13 privacy, depending on the facts.

14           Before balancing these interests,  
15 however, it must be determined more  
16 precisely what interests are at stake. This  
17 determination includes consideration of  
18 various facets of the public interest and is  
19 required by the language of the right to  
20 know provision, which calls for a balancing  
21 of the "demands of individual privacy" and  
22 the "merits of disclosure."

23           Missoulian v. Board of Regents, 207 Mont. 513, 529, 675 P.2d  
24 962, 971 (1984).

25           Here, the interest at stake is proprietary geological  
information. In Mountain States Tel. and Tel. Co. v. Department  
of Pub. Serv. Regulation, 194 Mont. 277, 634 P.2d 181 (1981),  
the court held that corporate trade secrets are entitled to  
constitutional protection. The court then applied the balancing  
test to determine under what conditions trade secrets could be  
publicly disclosed.

          In Belth vs. Bennett, 227 Mont. 341, 740 P.2d 638  
(1987), the court upheld the constitutionality of Section 33-1-

1 412(5) which provides that the commissioner of insurance "may  
2 withhold from public inspection any examination or investigation  
3 report for so long as he deems such withholding to be necessary  
4 for the protection of the person examined against unwarranted  
5 injury or to be in the public interest." The court found that  
6 the statute is an alternative expression of the constitutional  
7 privacy exception found in Article II, Section 9, of the Consti-  
8 tution, and that the commissioner could only invoke the statute  
9 when the demand of individual privacy clearly exceeded the  
10 merits of public disclosure. The court went on to note that the  
11 statute authorizes the commissioner to make an initial decision  
12 as to whether the privacy rights outweigh the need for public  
13 disclosure. Belth at 346, 740 P.2d at 641.

14 In this case Plaintiffs are not seeking proprietary  
15 geological information. DSL's files, however, contain other  
16 information which is not proprietary geological information.  
17 The file on the Montanore project, one of those requested by  
18 Jensen, does not contain any proprietary information.

19 Unlike the statute at issue in Belth, Section 82-4-  
20 306, MCA, does not authorize DSL to make an initial determina-  
21 tion of whether the privacy rights of the applicant outweigh the  
22 need for public disclosure. Rather, the statute requires DSL  
23 keep all information confidential unless the applicant gives DSL  
24 a waiver. This is in direct conflict with Article II, Section  
25

1 9, and the cases which have interpreted it.

2 DSL argues that the legislature has performed the  
3 required constitutional balancing test. The Court disagrees for  
4 a number of reasons. First, the statute was enacted in 1971,  
5 prior to the adoption of the Constitution. Second, the legisla-  
6 tive history does not support a conclusion that the legislature  
7 applied the balancing test. Third, Article II, Section 9, is a  
8 self-executing provision. Allstate Ins. Co. v. City of  
9 Billings, 239 Mont. 321, 780 P.2d 186 (1989). Fourth, in  
10 applying the balancing test it is necessary to look at "the  
11 competing constitutional interests in the context of the facts  
12 of each case, to determine whether the demands of individual  
13 privacy clearly exceed the merits of public disclosure."  
14 Missoulian at 529, 675 P.2d at 971. Fifth, as the court noted  
15 in Allstate, the constitutional provisions control the  
16 legislature, not vice versa.

17 For the foregoing reasons, the Court concludes that  
18 the blanket provision of Section 82-4-306, MCA, which requires  
19 DSL to keep all information confidential, is unconstitutional on  
20 its face. This does not mean that everything in DSL's files  
21 should now be made available for public inspection. Proprietary  
22 geological information is still entitled to protection in  
23 accordance with Article II, Section 9. In determining whether  
24 information in its files should be made available for public  
25

1 inspection, DSL should apply the balancing test established by  
2 the decisions of the Montana Supreme Court. If after applying  
3 the test there is a dispute as to whether information should be  
4 released, the affected parties can petition this Court for  
5 appropriate relief.

6 The only remaining issue is whether mandamus is the  
7 proper remedy. Mandamus lies only to compel the performance of  
8 a clear legal duty. Section 27-26-102, MCA; State ex rel. Swart  
9 vs. Casne, 172 Mont. 302, 564 P.2d 983 (1977). The issue here  
10 is whether there was a clear legal duty on the part of DSL to  
11 make the requested files available to Jensen for inspection.  
12 Under the facts of this case, the Court concludes that DSL did  
13 not have a clear legal duty to make the files available for  
14 inspection and therefore mandamus is not the proper remedy.

15 Section 82-4-306, MCA, specifically prohibited DSL  
16 from releasing any information in the files. There is also a  
17 strong presumption that a statute is constitutionally valid.  
18 McClanathan v. Smith, 186 Mont. 56, 65, 606 P.2d 507, 512  
19 (1980). Furthermore, "it is the duty of the courts to uphold  
20 the constitutionality of legislative enactments if such can be  
21 accomplished by reasonable construction." North Cent. Services,  
22 Inc. v. Hafdahl, 191 Mont. 440, 444, 625 P.2d 56, 58 (1981).  
23 Finally, the Court notes that failure to comply with the secrecy  
24 provisions of Section 82-4-306, MCA, is punishable by a fine of  
25

1 up to \$1,000. For these reasons, it was not unreasonable for  
2 DSL to refuse Plaintiffs' request to review the files.

3 For these reasons,

4 IT IS ORDERED that the foregoing shall constitute the  
5 declaratory judgment of this Court and that judgment should be  
6 entered in favor of Plaintiffs in accordance with this  
7 Memorandum and Order.

8 DATED this 25<sup>th</sup> day of September, 1992.

Plaintiffs,

vs.

MONTANA DEPARTMENT OF STATE LANDS,  
a Department of the State of  
Montana,

Defendant,

and

THE MONTANA MINING ASSOCIATION,

Intervenor-Defendant.

\* \* \* \* \*

Cause No. CDV-92-020

MEMORANDUM AND ORDER

The issue before the Court is whether Section 82-4-  
306, MCA, is unconstitutional because it violates Article II,

1 Section 9, of the Montana Constitution. The issue has been  
2 fully briefed and is ready for decision.

3 BACKGROUND

4 On November 25, 1991, James Jensen, executive director  
5 of the Montana Environmental Information Center (MEIC), wrote  
6 Sandy Olsen, chief of the Hard Rock Bureau of the Montana  
7 Department of State Lands (DSL), requesting information about  
8 four exploration licenses issued by DSL for mining exploration  
9 on private land. In his letter Jensen stated that he was  
10 especially interested in any restrictions or requirements,  
11 including performance bonds, which might have been placed on the  
12 licensees relating to hazardous materials management, air and  
13 water quality protection and reclamation. He also requested a  
14 copy of the environmental assessment DSL had prepared on the  
15 exploration permit for the Montanore project, a large explora-  
16 tion tunnelling project adjacent to and beneath the Cabinet  
17 Mountains Wilderness Area.

18 Relying on the provisions of Section 82-4-306, MCA,  
19 Olsen wrote Jensen on November 26, 1991, stating that she could  
20 not approve his request to look at specific exploration files  
21 concerning private lands. Also on November 26, 1991, Jensen  
22 received a press release from Noranda Minerals Corp., owner of  
23 the Montanore project, stating that Noranda was interrupting its  
24 exploration tunnelling activities at the Montanore project in  
25

1 response to an "advisory issued by the Montana Department of  
2 State Lands requiring that Noranda Minerals initiate immediate  
3 action to reduce nitrate levels in the water of Libby Creek."

4 Plaintiffs filed this action on January 6, 1992. On  
5 January 9, 1992, Noranda Minerals' project director for the  
6 Montanore project wrote DSL and gave DSL a partial waiver of  
7 confidentiality as to the Montanore project. The letter stated  
8 that the file does not contain proprietary geological  
9 information.

#### 10 DISCUSSION

11 Section 82-4-331(1), MCA, provides that no one may  
12 engage in exploration without first obtaining an exploration  
13 license from DSL. Under Section 82-4-332, MCA, an application  
14 must "include an exploration map or sketch in sufficient detail  
15 to locate the area to be explored and to determine whether  
16 significant environmental problems would be encountered." The  
17 applicant must also submit a plan of operation which provides a  
18 detailed description of the proposed exploration activities; a  
19 description of the environment potentially affected by the  
20 exploration activities; and a reclamation plan.

21 After DSL determines that an application is complete,  
22 it evaluates the information submitted; does a site inspection;  
23 and prepares an environmental assessment. As part of its  
24 review, DSL determines whether conditions should be placed on a  
25

1 license. Also, a reclamation bond needs to be posted prior to  
2 issuance of any exploration license. After a license has been  
3 issued, DSL monitors the licensee to insure compliance with the  
4 license requirements and state laws. As part of the monitoring  
5 process, the licensee may be required to submit periodic reports  
6 to DSL. If it appears that a licensee is not in compliance with  
7 its license, DSL may issue a notice of non-compliance and order  
8 the licensee to take corrective action. DSL's file on a partic-  
9 ular license may contain correspondence, notes from telephone  
10 calls and meetings and citizens' complaints.

11 Section 82-4-306, MCA, provides:

12 Confidentiality of application  
13 information. (1) Except as provided in  
14 subsections (2) and (3), any information  
15 obtained by the board or by the director or  
16 his staff by virtue of applications for  
17 exploration licenses and all information  
18 obtained from small miners is confidential  
19 between the board and the applicant, except  
20 as to the name of the applicant and the  
21 county of proposed operation; provided that  
22 all activities conducted subsequent to ex-  
23 ploration and other associated facilities  
24 shall be public information and conducted  
25 under an operating permit.

(2) Any information referenced in sub-  
section (1) is properly admissible in any  
hearing conducted by the director, the  
board, appeals board, or in any judicial  
proceeding to which the director and the  
applicant are parties and is not confiden-  
tial when a violation of this part or rules  
adopted under this part has been determined  
by the department or by judicial order.

(3) The department may disclose

1 information obtained by the board, the  
2 commissioner, or department staff from  
3 exploration license applications and from  
4 small miners for exploration or mining on  
5 state and federal lands that identifies the  
6 location of exploration and mining  
7 activities and that describes the surface  
8 disturbance that is occurring or projected  
9 to occur. The department may not disclose a  
10 licensee's or small miner's proprietary  
11 geological information.

12 (4) Failure to comply with the secrecy  
13 provisions of this part is punishable by a  
14 fine of up to \$1,000. (Emphasis supplied.)

15 Plaintiffs contend that this statute, which requires  
16 DSL to keep confidential all information obtained by it from  
17 applicants for exploratory licenses or from small miners,  
18 irreconcilably conflicts with Article II, Section 9, of the  
19 Montana Constitution which provides:

20 Right to know. No person shall be  
21 deprived of the right to examine documents  
22 or to observe the deliberations of all  
23 public bodies or agencies of state govern-  
24 ment and its subdivisions, except in cases  
25 in which the demand of individual privacy  
clearly exceeds the merits of public  
disclosure.

26 The Montana Supreme Court has developed a two-part  
27 balancing test to determine whether a person has a constitu-  
28 tionally protected privacy interest. Montana Human Rights Div.  
29 v. City of Billings, 199 Mont. 434, 442, 649 P.2d 1283, 1287  
30 (1982). First, there must be a determination as to whether a  
31 person has a subjective or actual expectation of privacy. The  
32 second part of the test is a determination of whether society

1 would recognize that expectation as reasonable. In applying the  
2 test to the Montana Open Meeting Act, the court stated:

3           However, the right to know is not  
4 absolute. The more specific closure stan-  
5 dard of the constitutional and statutory  
6 provisions requires this Court to balance  
7 the competing constitutional interests in  
8 the context of the facts of each case, to  
9 determine whether the demands of individual  
10 privacy clearly exceed the merits of public  
11 disclosure. Under this standard, the right  
12 to know *may* outweigh the right of individual  
13 privacy, depending on the facts.

14           Before balancing these interests,  
15 however, it must be determined more  
16 precisely what interests are at stake. This  
17 determination includes consideration of  
18 various facets of the public interest and is  
19 required by the language of the right to  
20 know provision, which calls for a balancing  
21 of the "demands of individual privacy" and  
22 the "merits of disclosure."

23           Missoulain v. Board of Regents, 207 Mont. 513, 529, 675 P.2d  
24 962, 971 (1984).

25           Here, the interest at stake is proprietary geological  
information. In Mountain States Tel. and Tel. Co. v. Department  
of Pub. Serv. Regulation, 194 Mont. 277, 634 P.2d 181 (1981),  
the court held that corporate trade secrets are entitled to  
constitutional protection. The court then applied the balancing  
test to determine under what conditions trade secrets could be  
publicly disclosed.

          In Belth vs. Bennett, 227 Mont. 341, 740 P.2d 638  
(1987), the court upheld the constitutionality of Section 33-1-

1 412(5) which provides that the commissioner of insurance "may  
2 withhold from public inspection any examination or investigation  
3 report for so long as he deems such withholding to be necessary  
4 for the protection of the person examined against unwarranted  
5 injury or to be in the public interest." The court found that  
6 the statute is an alternative expression of the constitutional  
7 privacy exception found in Article II, Section 9, of the Consti-  
8 tution, and that the commissioner could only invoke the statute  
9 when the demand of individual privacy clearly exceeded the  
10 merits of public disclosure. The court went on to note that the  
11 statute authorizes the commissioner to make an initial decision  
12 as to whether the privacy rights outweigh the need for public  
13 disclosure. Belth at 346, 740 P.2d at 641.

14 In this case Plaintiffs are not seeking proprietary  
15 geological information. DSL's files, however, contain other  
16 information which is not proprietary geological information.  
17 The file on the Montanore project, one of those requested by  
18 Jensen, does not contain any proprietary information.

19 Unlike the statute at issue in Belth, Section 82-4-  
20 306, MCA, does not authorize DSL to make an initial determina-  
21 tion of whether the privacy rights of the applicant outweigh the  
22 need for public disclosure. Rather, the statute requires DSL  
23 keep all information confidential unless the applicant gives DSL  
24 a waiver. This is in direct conflict with Article II, Section  
25

1 9, and the cases which have interpreted it.

2 DSL argues that the legislature has performed the  
3 required constitutional balancing test. The Court disagrees for  
4 a number of reasons. First, the statute was enacted in 1971,  
5 prior to the adoption of the Constitution. Second, the legisla-  
6 tive history does not support a conclusion that the legislature  
7 applied the balancing test. Third, Article II, Section 9, is a  
8 self-executing provision. Allstate Ins. Co. v. City of  
9 Billings, 239 Mont. 321, 780 P.2d 186 (1989). Fourth, in  
10 applying the balancing test it is necessary to look at "the  
11 competing constitutional interests in the context of the facts  
12 of each case, to determine whether the demands of individual  
13 privacy clearly exceed the merits of public disclosure."  
14 Missouliau at 529, 675 P.2d at 971. Fifth, as the court noted  
15 in Allstate, the constitutional provisions control the  
16 legislature, not vice versa.

17 For the foregoing reasons, the Court concludes that  
18 the blanket provision of Section 82-4-306, MCA, which requires  
19 DSL to keep all information confidential, is unconstitutional on  
20 its face. This does not mean that everything in DSL's files  
21 should now be made available for public inspection. Proprietary  
22 geological information is still entitled to protection in  
23 accordance with Article II, Section 9. In determining whether  
24 information in its files should be made available for public  
25

1 inspection, DSL should apply the balancing test established by  
2 the decisions of the Montana Supreme Court. If after applying  
3 the test there is a dispute as to whether information should be  
4 released, the affected parties can petition this Court for  
5 appropriate relief.

6 The only remaining issue is whether mandamus is the  
7 proper remedy. Mandamus lies only to compel the performance of  
8 a clear legal duty. Section 27-26-102, MCA; State ex rel. Swart  
9 vs. Casne, 172 Mont. 302, 564 P.2d 983 (1977). The issue here  
10 is whether there was a clear legal duty on the part of DSL to  
11 make the requested files available to Jensen for inspection.  
12 Under the facts of this case, the Court concludes that DSL did  
13 not have a clear legal duty to make the files available for  
14 inspection and therefore mandamus is not the proper remedy.

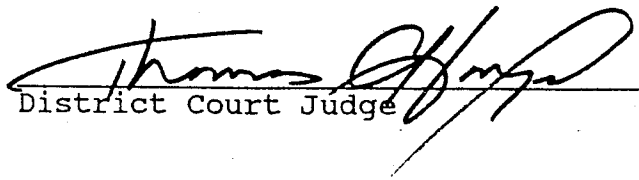

15 Section 82-4-306, MCA, specifically prohibited DSL  
16 from releasing any information in the files. There is also a  
17 strong presumption that a statute is constitutionally valid.  
18 McClanathan v. Smith, 186 Mont. 56, 65, 606 P.2d 507, 512  
19 (1980). Furthermore, "it is the duty of the courts to uphold  
20 the constitutionality of legislative enactments if such can be  
21 accomplished by reasonable construction." North Cent. Services,  
22 Inc. v. Hafdahl, 191 Mont. 440, 444, 625 P.2d 56, 58 (1981).  
23 Finally, the Court notes that failure to comply with the secrecy  
24 provisions of Section 82-4-306, MCA, is punishable by a fine of  
25

1 up to \$1,000. For these reasons, it was not unreasonable for  
2 DSL to refuse Plaintiffs' request to review the files.

3 For these reasons,

4 IT IS ORDERED that the foregoing shall constitute the  
5 declaratory judgment of this Court and that judgment should be  
6 entered in favor of Plaintiffs in accordance with this  
7 Memorandum and Order.

8 DATED this 25<sup>th</sup> day of September, 1992.
